

## Water Tanks with Quality Features.

### 5 Year Warranty

All of our quality tanks are backed by a five year written, limited guaranty.

### Stainless Steel Water Connection

All of our Online®, Well-Rite®, Challenger® and H<sub>2</sub>Pro tanks are constructed with a stainless steel water connection that is welded to the tank wall. We believe that this weld provides the strongest water connection in the industry. Our connection is totally lead free, NSF approved for the highest sanitary standard.

### Helium Tested

In order to provide the highest quality tanks, we subject our tanks to helium testing and pressure testing to ensure the structural integrity of our tanks.

### Controlled Action Diaphragm

Flexcon's patented controlled action, double diaphragm assembly completely contains drawdown water. This design prevents our diaphragm from chafing against the tank wall and surrounds the diaphragm in a pre-pressurized atmosphere.

## Tank Replacement Guide

Use the following as a guide to replace existing tanks with a Prepressurized Diaphragm well tank...
